

THE MOST PRIZED POSSESSIONS

FOUR DECADES
OF EXPORT
MASTERY
POURED INTO
GRANITE
QUARTZ &
EXOTIC STONE
MADE IN INDIA

From the legacy of

**JYOTHI GRANITE
EXPORTS**

THE STANDARD
THE WORLD TRUSTS
NOW MADE
FOR INDIA

For over four decades, Jyothi Exports has treated stone as a lineage to be protected rather than a product to be moved. Every facility is certified. Every output is verified. The raw earth that enters becomes the most considered surface in a room. The benchmarks others follow across continents are the ones Jyothi has set.

- 100% export
- 30+ years
- 2,000+ workforce

**Reaching the world's
most prestigious postcodes**

- Middle East
- Asia
- Asia Pacific
- Europe
- North America
- Africa

Dr. Sidda Raghava Rao
Chairman
Jyothi Exports

“ For decades, Indian architecture was defined by utility. Today, it is defined by identity. We are witnessing a monumental shift where the home is a curated gallery of one’s life. We founded Quantum to meet this moment and to move beyond the 'commodity' of stone and offer the 'certainty' of a masterpiece.”

Shri Sidda Sudheer Kumar
Managing Director
Jyothi Exports

“ Luxury is a hollow word without the infrastructure to sustain it. At Quantum, we’ve taken the global rigour and logistical mastery of Jyothi Exports and distilled it into a singular, domestic powerhouse. By marrying our heritage of international excellence with cutting-edge Italian engineering, we are elevating stone from a building material to the room’s most essential piece of art.”

At Quantum, we craft stone surfaces for those who choose what endures. Because in spaces where everything is exceptional, only a few things are essential.

QUARTZ

SCALE THAT MAKES THE
SOPHISTICATION POSSIBLE

COMPOSURE THAT COMMANDS ATTENTION

Quantum is home to the largest engineered quartz facility in the country. That scale is the reason an architect can specify a surface down to its colour, vein, and proportion and have it manufactured rather than substituted. Capacity is what turns a drawing into a slab.

Quantum Quartz Capacity

- 5 lakh square feet per month production capacity
- Two fully automated casting lines for precision manufacturing
- End-to-end processing under one roof
- Partnership with Pedrini, Italy, a global leader in stone technology
- A 145-metre single production line ensuring flawless consistency

MADE TO A STANDARD HELD TO A RESPONSIBILITY

The quality that satisfied 35 export markets is verified at every stage of production here. And it is made without cost to the earth it comes from. Quantum runs as a zero-waste operation, recycles almost everything it touches, and powers its facility on the sun.

- **World-class quality benchmarks across every collection**
- **NSF and ANSI certified for international applications**
- **Quality verified at every stage of production**
- **Zero-waste operation, 98% of material recycled**
- **Solar powered for round-the-clock supply**

A LINE BUILT FOR
UNCOMPROMISED
CONSISTENCY

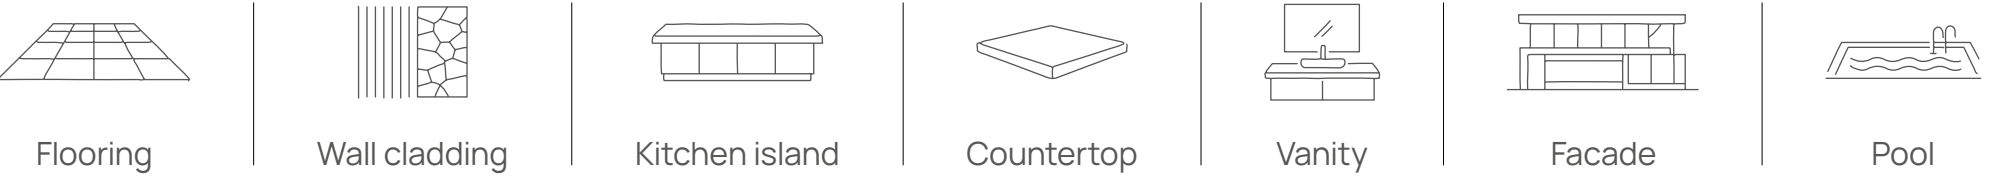

A 145-metre single production line
ensuring flawless consistency

CONSISTENCY
ENGINEERED INTO
EVERY SLAB

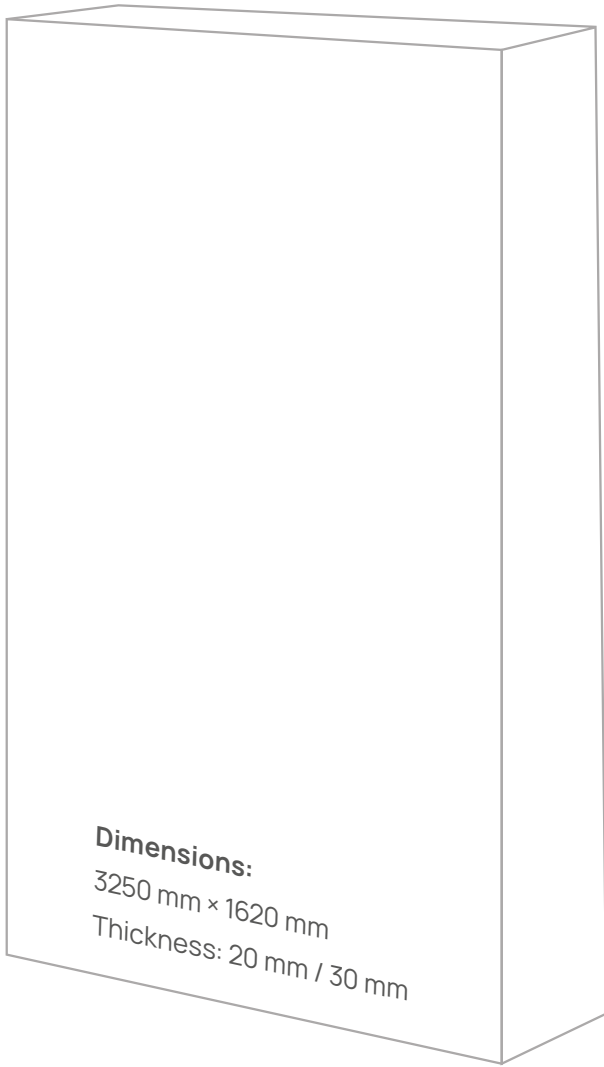

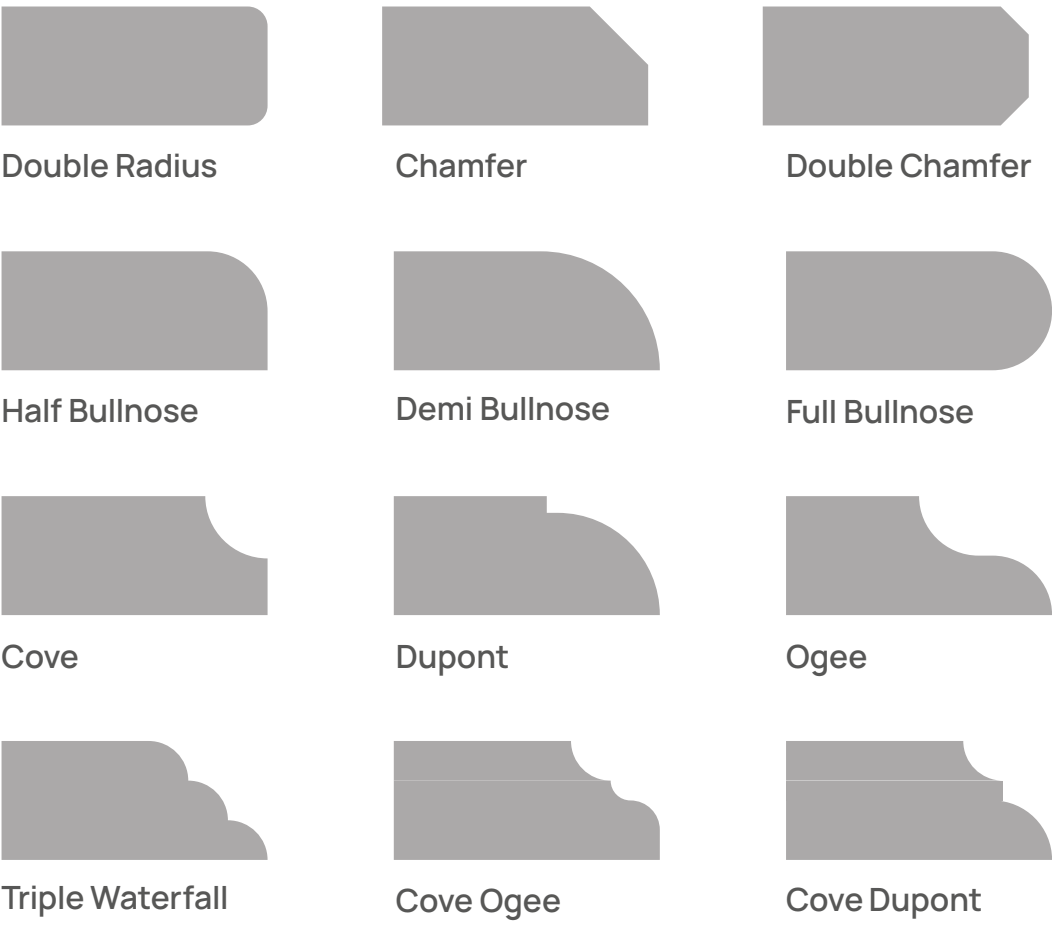

ONE SURFACE SPECIFIED FOR ANY SPACE

Quantum quartz is made to live anywhere a project demands, from a kitchen island to a facade, without changing its character. The same slab that grounds a living room performs in a high-traffic lobby. The application changes while the surface stays permanent.

EDGE PROFILE

Detail defines the difference between a surface and architecture.

The final millimetre is where design becomes architecture. Edge detailing controls shadow, weight, and proportion, defining how a surface is perceived within a space.

PERFORMANCE THAT MATCHES PRESENCE

Granite and quartz are chosen not only for their beauty, but for the assurance they bring to a space. Their strength, stability, and resistance to everyday wear make them surfaces that remain composed through years of use.

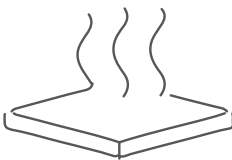

Scratch Resistance

Maintains surface integrity under regular use.

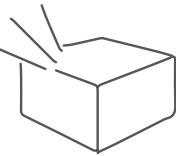

Stain Resistance

Non-porous structure prevents absorption of spills.

Heat Resistance

Performs reliably under high-temperature conditions.

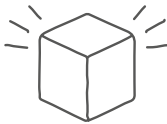

Impact Strength

Built to withstand everyday wear and pressure.

Low Maintenance

Requires minimal care to retain original finish.

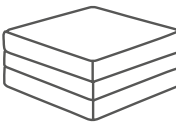

Colour Stability

Retains tone and depth over years of use.

Hygienic Surface

Smooth finish resists bacteria and moisture.

Structural Density

Solid composition ensures long-term performance.

Timeless Appearance

Design that remains relevant across changing trends.

CUSTOMISABLE ENGINEERED QUARTZ

At Quantum, the surface is manufactured around the intent. Colour direction, slab length, vein movement, pattern, finish. Every element is calibrated to the design, not the other way around. Because the capacity and the line exist, customisation is not a special request. It is the standard.

Surfaces that adapt to design and function

- Tailored colour palettes to match architectural themes.
- Batch-matched vein flow for visual continuity across a project.
- Custom patterns developed to suit project identity.
- Flexible slab sizing for uninterrupted spans.
- Finish selections aligned to light and mood.
- Controlled pigmentation for colour accuracy.

Delivering performance where luxury is expected

- **The chef's island:** an impenetrable workspace built for high-intensity use.
- **The surgeon's surface:** a zero-porosity matrix that holds a sterile barrier in wellness and clinical zones.
- **The curator's gallery:** specified for high-traffic lobbies and corridors.
- **The artisan's detail:** structural uniformity that allows monolithic sinks, seamless mitred joinery, and a razor-sharp edge.
- **The engineer's choice:** an optimised weight-to-strength ratio, ideal for lift interiors and vertical cladding.
- **The hotelier's standard:** built for the repetitive demands of multi-unit developments.
- **The spa's sanctum:** naturally resistant to steam and mineral deposits.
- **The director's suite:** a high-density foundation for bespoke conference tables and custom furniture.

GRANITE

QUARRIED BY US
FINISHED FOR THE WORLD

THE MACHINERY THAT MAKES BESPOKE POSSIBLE

Multiwire Jupiter, Pedrini (Italy)
72 diamond wires, one pass, uniform slabs.

Gangsaw, Gaspari Menotti (Italy)
4.5 x 3.5 m frame, full-block precision cutting.

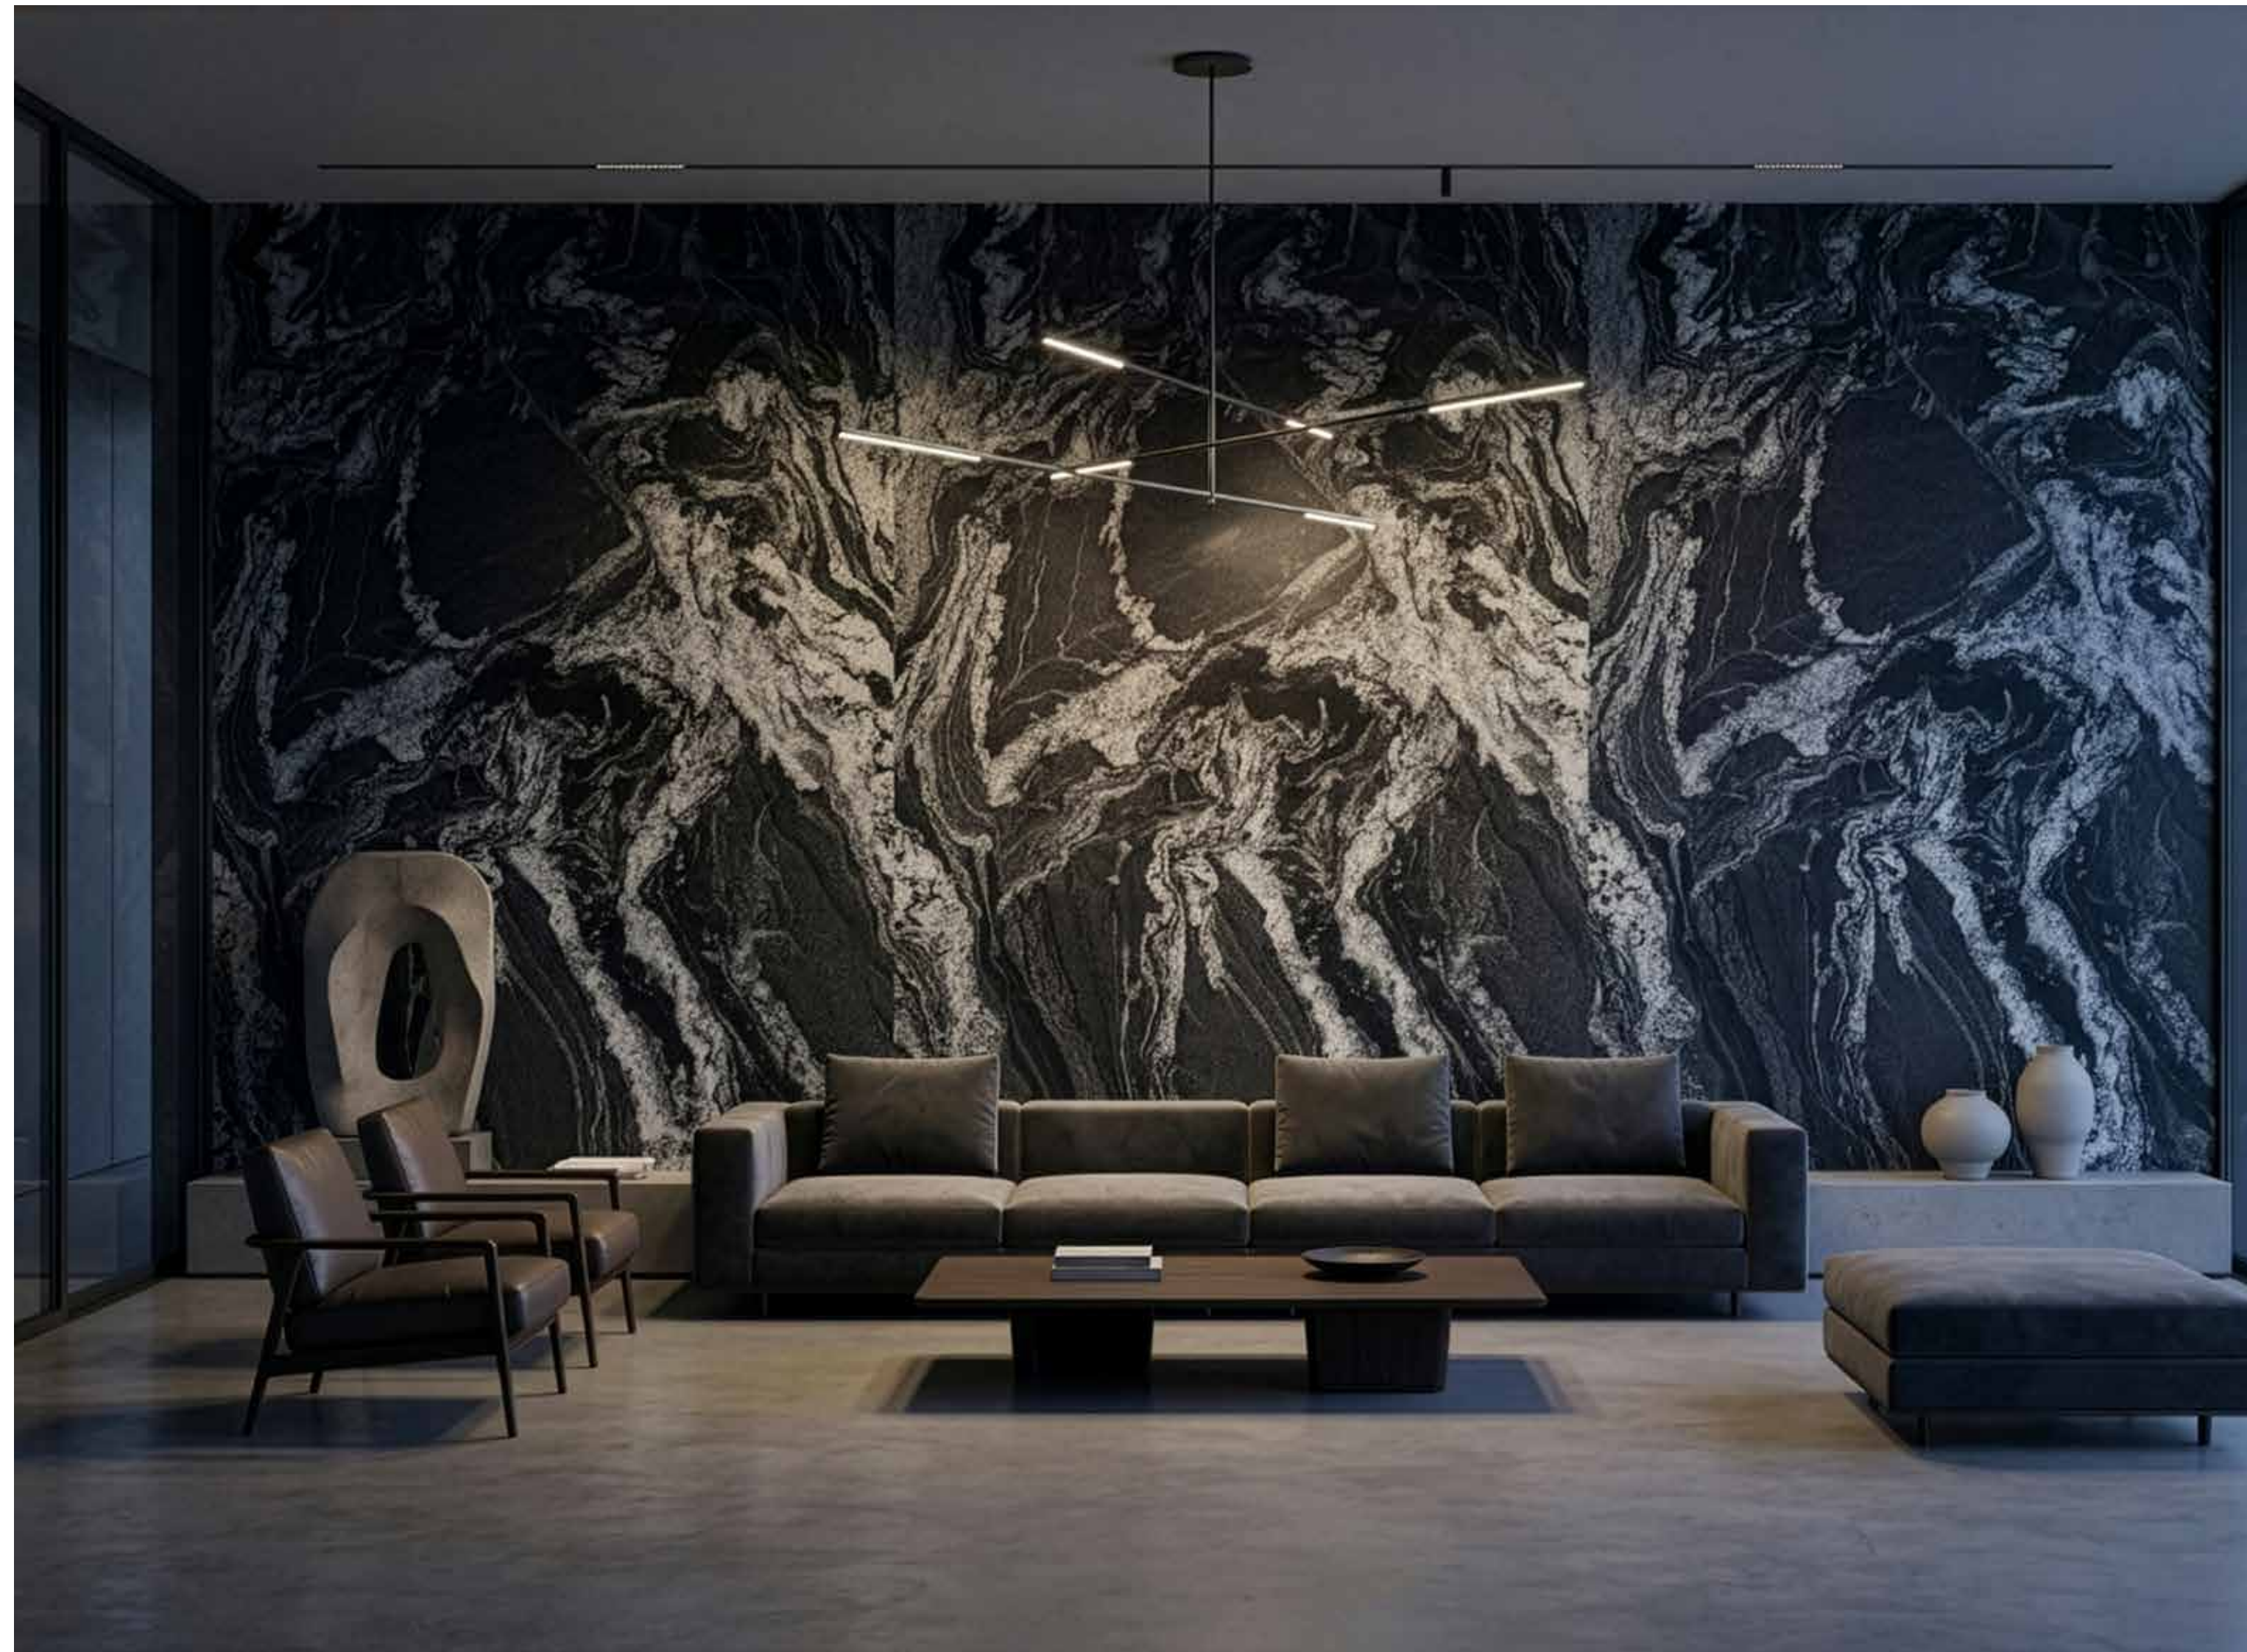

A SURFACE THAT KEEPS ITS RANK

Granite can only be found first, and then handled well. Quantum has the advantage on both counts. The stone comes from its own mines, and it is cut and finished on the same Italian lines that serve 35 countries. The result is natural stone, refined to a standard most of the market has to import.

- Naturally strong and highly durable.
- Distinctive patterns formed over time.
- Suitable for both interior and exterior applications.
- Ages gracefully with minimal maintenance.

Finishes

- Polished
- Honed
- Leather
- Lepothara
- Flamed & Brushed

EXOTIC STONE

DISTINCT ENOUGH TO
STAND ALONE

SOURCED FROM THE WORLD, HELD TO ONE STANDARD

Quantum reaches across the globe for stone that exists in limited volume and cannot be reproduced. Each slab is chosen for depth, movement, and individuality, then finished to the same exacting standard as everything else that leaves the facility. No two are alike. None are meant to repeat. A space that holds one of these holds something no other space can claim.
